Career Objective

Computer Science undergraduate focused on software engineering, backend development, and scalable data-driven applications. Proficient in C++, Java, Python, and JavaScript with experience building web-based applications and analytical software systems. Strong foundation in data structures, algorithms, and system design.

Education

VNR Vignana Jyothi Institute of Engineering and Technology
Computer Science Engineering (IoT)
SR Junior College -Intermediate
St. Alphonsus High School -SSC Secondary Education

2024–2028 B.Tech in
CGPA: 9.42/10
Percentage: 98.4%
GPA: 10/10

Projects

Solar Energy Monitoring System

- Built a monitoring system to analyze solar energy performance using sensor data.
- Executed **real-time data collection** and processing for performance analytics.
- Planned monitoring logic to detect irregular system behavior and improve system reliability.
- Executed real-time data collection and processing for **performance analytics, testing, and improvement of system reliability**.

Resume Feedback Generator

- Built a web-based resume analysis platform using **HTML, CSS, Bootstrap, and JavaScript**.
- Applied rule-based evaluation techniques to perform automated resume analytics.
- Created **responsive user interface** components with validation checks to improve reliability.
- Enforced dynamic page updates to display feedback results instantly.

Physics Simulator

- Built a browser-based physics simulation tool using **JavaScript** and **HTML5 Canvas**.
- Applied **mathematical modelling** for motion, velocity, and acceleration calculations.
- Developed real-time visual simulations using animation loops.

Technical Skills

Programming Languages: C, C++, Java, Python

Web Development: HTML, CSS, Bootstrap, JavaScript, React.js

Backend Development: Node.js, Express.js, REST APIs

Databases: MySQL, MongoDB

Core Concepts: Data Structures, Algorithms, Object-Oriented Programming, DBMS, Software Engineering

Tools: Git, GitHub, VS Code

Achievements

- **Semi-Finalist** – CodeVerse Programming Contest
- **Semi-Finalist** – Winter Coding Contest
- Participant – Build and Break Innovation Challenge
- Completed **AI Immersion Program** on machine learning concepts

Programs and Certifications

- **AI Immersion Program** – VNRVJIET
- **Drone Technology Workshop** – AGMAY Technologies
- **SoloLearn** Certifications – Java, Python, HTML, SQL

Positions of Responsibility

- **Volunteer** – NSS VNRVJIET, community service activities and blood donation drives
- **Volunteer** – Art of Living Club, student well-being initiatives
- Member – Turing Hut Competitive Programming Club
